

## Description

The cultivar name means “Little Evergreen” in German. This is a robust, beautiful plant with green to reddish foliage with a profusion of bright gold, pollinator-attracting flowers in the summer. In autumn, the leaves turn bright red-orange with lime and yellow tones, creating one of the best cold-weather displays, with foliage persisting through the winter. A very adaptable plant, this species spreads quickly to create a mat, but is somewhat slower-growing than the similar *Sedum kamschaticum*. ‘Immergrünchen’ will also tolerate some shade, making it a very versatile green roof plant.

## Profile

- **Botanical Name:** *Sedum hybridum* 'Immergrünchen'
- **Family:** Crassulaceae
- **Plant Type:** Hardy Succulent
- **Plant Usage:** Ground Cover
- **Hardiness Zone:** 4
- **Foliage Color:** Green
- **Flower Color:** Yellow
- **Bloom Time:** Mid to Late Summer
- **Winter Interest:** Orange-Red Foliage
- **Height:** 4"
- **Spread:** 8"
- **Light Requirement:** Full Sun to Partial Shade
- **Origin:** Siberia and Mongolia
- **Self Sowing:** No
- **Shade Tolerant:** Partial
- **Substitutes:** [Sedum kamsch. var. flor.](#), [Weihenstephaner Gold](#), [Sedum middendorffianum var. diffusum](#),
